Bahir Dar, Ethiopia

EDUCATION

Bachelor of Science in Computer Science in Bahir Dar University, Bahir Dar, Ethiopia

- Cumulative GPA: 3.79
- Enrollment: February 2024
- Expected Graduation: June 2026

LANGUAGE

Amharic (Native)

English (Fluent)

ABOUT ME

Motivated and high-achieving Computer Science student at Bahir Dar University with a strong academic record (3.79 GPA) and a solid foundation in full-stack web development and modern AI integration frameworks. Possesses internship experience, applying theoretical knowledge to build practical solutions using technologies like Python, JavaScript, Node.js and React.

EXPERIENCE

June 2025 - August 2025

Alyah Software | Bahir Dar, Ethiopia

Software Developer Intern

- Collaborated with a development team to design, develop, and test web application features using Node, Express, MySQL, Sequelize, React, Expo.
- Assisted in building and consuming RESTful APIs, ensuring efficient data flow between the frontend and backend systems.
- Gained practical experience in the full software development lifecycle, from requirement analysis to deployment.

SKILL

- **Programming Languages:** Python, JavaScript, TypeScript,
- **Backend:** FastAPI, Flask, Express.js, Node.js, GraphQL (Apollo Server, Strawberry, Ariadne), RESTful API Design
- **Frontend:** React, React Native/Expo, Tailwind CSS
- **Databases:** PostgreSQL, MySQL, SQLite, MongoDB
- **ORMs:** SQLAlchemy, Sequelize, Mongoose
- **AI & Emerging Tech:** LangChain, LangGraph
- **Tools:** Git, GitHub, Postman, Swagger (OpenAPI), Linux
- **Soft Skills:**
 - Problem-Solving,
 - Quick Learner,
 - Strong Work Ethic
 - Team Collaboration and Communication

Projects

AI-Powered Learning Platform

- Developed an AI-driven learning platform that delivers personalized educational content.
- Integrated AI features to enhance learning efficiency.
- Built a scalable full-stack system with modern mobile app technologies.
- Project link: https://github.com/yopeman/AI_Powered_Learning_Platform

Fidel AI

- Built an AI-powered assistant platform focused on language learning.
- Implemented core AI functionalities such as user interaction through conversational interfaces and personalized learning path.
- Designed a full-stack architecture integrating backend APIs with a modern mobile app technologies for seamless user experience.
- Project link: https://github.com/Final-Year-Project_Fidel-AI

Graph Blog Platform

- Developed a modern blogging platform with graph-based data representation for enhanced content organization and relationships.
- Implemented features such as post creation, editing, and dynamic content visualization using graph structures.
- Project link: https://github.com/yopeman/graph_blog

Smart Todo App

- Created a smart task management application to help users organize and prioritize daily activities efficiently.
- Implemented features such as task creation, updates, deadlines, and status tracking.
- Integrated AI assistant for task creation, updates and report generations
- Project link: <https://github.com/yopeman/smart-todo-app>
