Addis Ababa, Ethiopia

EDUCATION

Bachelor of Science in Computer Science in Bahir Dar University, Bahir Dar, Ethiopia

- Cumulative GPA: 3.81
- Graduated at: June 2026

LANGUAGE

- Amharic (Native)
- English (Professional Working Proficiency)

FINAL YEAR PROJECT

Fidel AI: is a full stack language learning platform that combines web, mobile, and backend services with AI powered tutoring and community features.

ABOUT ME

Backend-focused Software Developer with strong frontend expertise and a B.Sc. in Computer Science from Bahir Dar University (2026, CGPA: 3.81/4.00). Experienced in designing scalable systems, solving complex technical challenges, and building reliable, maintainable software. Passionate about backend engineering and AI enabled applications, with a proven ability to apply emerging technologies to real-world problems.

INTERNSHIP

Alyah Software | Bahir Dar, Ethiopia
June 2025 - August 2025

Software Developer Intern

- Collaborated with a development team to design, develop, and test web application features using Node, Express, MySQL, Sequelize, React, Expo.
- Assisted in building and consuming RESTful APIs, ensuring efficient data flow between the frontend and backend systems.
- Gained practical experience in the full software development lifecycle, from requirement analysis to deployment.

SKILL

- **Programming Languages:** Python, JavaScript, TypeScript,
- **Backend:** FastAPI, Flask, Express.js, Node.js, GraphQL (Apollo Server, Strawberry, Ariadne), RESTful API Design
- **Frontend:** React, React Native/Expo, Tailwind CSS
- **Databases:** PostgreSQL, MySQL, SQLite, MongoDB
- **ORMs:** SQLAlchemy, Sequelize, Mongoose
- **AI & Emerging Tech:** LangChain, LangGraph
- **Tools:** Git, GitHub, Postman, Swagger (OpenAPI), Linux
- **Soft Skills:**
 - Problem-Solving,
 - Quick Learner,
 - Strong Work Ethic
 - Team Collaboration and Communication

CERTIFICATS

1. Tool Use AI with LangChain from Percipio
2. Controlled AI Workflows with LangGraph from Percipio
3. BDU BiT top Commitment
4. BDU AI Hackaton Certificate

SMART TODOS

The smart-todo-app project is an AI-powered project and task management platform with web and mobile interfaces.

It solves the need for intelligent project coordination by automating task creation, updates, reporting, and voice-enabled interaction in a collaborative workspace.

Website: <https://smart-todos.vercel.app>

AIPLP

The AI-Powered Learning Platform (AiPLP) project is a full-stack educational ecosystem for students, teaching assistants, and administrators.

MY PROJECTS

FIDEL AI

The AI-Powered Learning Platform (AiPLP) project is a full-stack educational ecosystem for students, teaching assistants, and administrators.

AiPLP solves the problem of fragmented learning systems by centralizing AI-generated course content, role-based access, payment handling, certification, and interactive tutoring into one platform.

Website: <https://aiplp.vercel.app>

AI TUTOR

The `complete_ai_tutor` project is a multi-agent autonomous learning platform that uses specialized AI agents to plan lessons, tutor learners, evaluate progress, and generate certificates.

It solves the limitations of one-size-fits-all education by delivering personalized, mastery-based study paths with AI-generated exams, interactive content, and adaptive feedback.

Website: <https://complete-ai-tutor.vercel.app>

SCHOOL E-ASSISTANT

The School e-Assistant project is a full-stack, AI-powered educational platform designed to support students and educators with study assistance, content management, and progress tracking.

School e-Assistant solves the problem of fragmented learning systems by centralizing AI-driven study assistance, content parsing, knowledge base management, user authentication, payment handling, and progress tracking into one comprehensive platform.
